Summary

Information Technology undergraduate with hands-on experience in full-stack web development using React.js, Node.js, Express.js, Java, and MongoDB. Experienced in developing responsive web applications, RESTful APIs, and database-driven systems. Strong understanding of software engineering principles, version control, and Agile development practices. Passionate about building scalable software solutions and continuously learning modern technologies.

Education

09/2022 – Present	BSc (Hons.) in Information Technology Specialization in Information Technology Sri Lanka Institute of Information Technology Expected Graduation: 2027
05/2023 – Present	BSc General Degree Program in Faculty of Applied Science Sri Jayawardhanapura University Subjects : Mathematics, Statistics, Computer Science Expected Graduation: 2027
2021	G.C.E. Advanced Level (Physical Science stream) C.W.W. Kannangara Central College - Matugama Physics - B, Chemistry - B, Combined Mathematics - C

Technical Skills

Programming Languages • Java • JavaScript • Python • PHP • Kotlin	Frontend Development • React.js • HTML5 • CSS3 • JavaScript • Responsive Web Development	Backend Development • Node.js • Express.js • RESTful APIs • PHP
Databases • MongoDB • MySQL • SQLite	Data Analytics & Business Intelligence • Microsoft Excel • Power BI • Data Analysis • Data Visualization • Data Cleaning	Tools & Technologies • Git • GitHub • Postman • Visual Studio Code
Software Engineering • Object-Oriented Programming (OOP) • MVC Architecture • SDLC • Agile Development • CI/CD Concepts • Version Control	AI & Productivity Tools • ChatGPT • Google Gemini • AI-assisted Development & Testing	Testing & Debugging • Unit Testing • Functional Testing • API Testing • Debugging

Projects

01/2025 – 06/2025	Secure Guard System – Booking Management Module (ReactJS, NodeJS, ExpressJS, MongoDB) • Developed a booking management module supporting 5 key operations including booking creation, rescheduling, cancellation, status tracking, and employee allocation.
-------------------	--

- Implemented booking creation, status tracking, rescheduling, and cancellation functionalities.
- Built secure authentication and authorization mechanisms for system users.
- Implemented real-time booking and employee availability management features to support operational scheduling and resource allocation.
- Created automated reporting functionalities to support operational decision-making.

07/2024 – 10/2024 **Peacock Corridor Holiday House Restaurant (ReactJS, NodeJS, Express, MongoDB)**

- Developed a reservation management system with 5+ core features including reservation management, authentication, reporting, search functionality, and user administration.
- Designed and implemented responsive user interfaces using React.js to improve customer booking experience.
- Built RESTful APIs and integrated a MongoDB database for reservation storage and management.
- Implemented 5+ functional modules including CRUD operations, search, authentication, reporting, and reservation tracking.
- Collaborated with team members using Git and GitHub for version control and project management.

07/2024 – 10/2024 **To Do app, Task Manager App (Kotlin, SQLite)**

- Developed an Android-based task management application for organizing daily activities.
- Implemented CRUD operations for task creation, updating, viewing, and deletion.
- Integrated SQLite database for local data storage and retrieval.
- Developed reminder and notification functionalities to improve task tracking.
- Designed an intuitive user interface to enhance usability and productivity.

07/2023 – 09/2023 **E-Channeling Web Application (Java, MySQL, HTML, CSS, JavaScript)**

- Developed a web-based medical appointment scheduling system using MVC architecture.
- Implemented CRUD operations across 3 user roles including patients, doctors, and administrators.
- Designed responsive front-end interface using HTML, CSS, and JavaScript.
- Integrated secure Java and MySQL backend for data management.
- Implemented role-based authentication for patients, doctors, and administrators.
- Added search and filter functionality for doctor availability and specialization.

04/2023 – 05/2023 **Online Auction System (HTML, CSS, JavaScript, PHP)**

- Developed a web-based online auction platform supporting real-time bidding.
- Implemented user registration, authentication, and secure access control features.
- Designed auction management functionalities, including item listings, bidding, and countdown timers.
- Developed an administrative dashboard for managing users and auction items.
- Enhanced user experience through responsive and interactive interfaces.

Personal Skills	
• Communication Skills	• Problem Solving and Analytical Thinking
• Positive Attitude and Team Player Mindset	• Time Management
• Leadership	• Fast Learner
• Adaptability	• Attention to Detail
